

RAVI KUMAR C

Data Analyst | Python & SQL | Machine Learning | Power BI

Tiruvallur, Tamil Nadu, India | +91-6374943436 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and B.Tech (AI & Data Science) undergraduate with hands-on experience across two data science internships and multiple end-to-end analytics projects. Skilled in Python, SQL, and Power BI for data cleaning, exploratory analysis, dashboard development, and predictive modeling. Proven record of improving reporting efficiency by up to 30% through automated workflows and DAX-based KPI dashboards. Seeking a full-time Data Analyst / Data Science role to apply strong analytical thinking and technical skills to real-world business problems.

CORE SKILLS

Programming Languages: Python, SQL, Java (Basics)

Data Handling: Excel, CSV, JSON, MySQL

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow

Tools & Platforms: Power BI, MySQL, Google Colab, Git, VS Code

Core Competencies: Data Analysis, Data Visualization, Machine Learning, Dashboard Design, Statistical Analysis, Data Cleaning & Preprocessing

Soft Skills: Analytical Thinking, Problem Solving, Communication, Fast Learner

PROFESSIONAL EXPERIENCE

Flutter Developer Intern | Beta Softnet, Tiruvallur

Jul 2026 – Present

- Architected and rendered fluid, responsive mobile UIs using Flutter and Dart across both Android and iOS platforms; designed custom animations, custom painters, and interactive UI components.
- Integrated complex RESTful APIs and WebSockets using Dio and HTTP packages to deliver real-time data synchronization.
- Optimized the render pipeline and widget trees, reducing frame drops and boosting overall application performance by 30%.

Data Science Intern | Vulture Lines Technologies

Jul 2025 – Aug 2025

- Built a data-driven project using PHP (XAMPP) and MySQL, applying data cleaning, querying, and statistical analysis techniques to manage and evaluate large datasets.
- Designed and automated data workflows that improved processing efficiency by 30% and increased the accuracy of evaluation reports.

PROJECTS

Customer Churn Prediction Model | Personal Project | Python, Machine Learning

Aug 2026

- Built a supervised machine learning pipeline using Scikit-learn to predict customer churn from historical usage and transaction data, achieving 87% classification accuracy.
- Engineered features from raw customer data and benchmarked Logistic Regression, Random Forest, and XGBoost models to reduce false negatives and improve prediction reliability.

Employee Attrition Analytics Dashboard | Personal Project | SQL, Power BI, DAX

Jun 2026

- Built an HR attrition dashboard with DAX-based KPIs and interactive visualizations to track workforce trends.
- Cleaned, queried, and transformed HR datasets using SQL, improving HR reporting efficiency by 20%.

Deepfake Content Monitoring and Real-Time Alert System for Social Media | Personal Project | Python, TensorFlow, ResNet, OpenCV

Apr 2026

- Built a deep learning-based deepfake detection system using the ResNet-18 architecture with transfer learning (ImageNet pretrained weights) to classify manipulated video frames.
- Implemented an OpenCV preprocessing and feature extraction pipeline for frame sampling, normalization, and model-ready inputs.
- Developed a real-time video inference and alert system to detect and flag manipulated social media content.

EDUCATION

B.Tech, Artificial Intelligence and Data Science | Prathyusha Engineering College

Nov 2022 – Present

CGPA: 8.2 / 10

Senior Secondary (Class XII) | Shree Niketan Patasala, Tiruvallur

Apr 2021 – May 2022

Percentage: 79.8%

CERTIFICATIONS & LANGUAGES

Certifications: [Generative AI Powered Data Analytics — TATA \(2025\)](#) | [Power BI — Microsoft \(2026\)](#)

Languages: English (Fluent) | Tamil (Fluent) | Hindi (Basics)
