EDUCATION

Prathyusha Engineering College , Tiruvallur

Bachelor of Technology in Artificial Intelligence and Data Science

Nov 2022 - Present

CGPA : 8.2/10

Shree Niketan Patasala , Tiruvallur

Senior Secondary - Class XII

April 2021- May 2022

Percentage : 79.8

CAREER OBJECTIVE

Machine Learning Engineer specializing in computer vision and predictive analytics using Python, TensorFlow, and Scikit-Learn. Experienced in building end-to-end ML pipelines, deploying deep learning models, and analyzing large datasets to deliver actionable insights. Passionate about applying AI to real-world problems in media authenticity and intelligent monitoring systems.

SKILLS

Programming Languages : Python,SQL,Java(Basics)

Machine Learning : Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering

Deep Learning : CNN, TensorFlow, Computer Vision

Libraries/Frameworks : NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, OpenCV

Data & Visualization : Power BI, Excel, Data Cleaning, Data Analysis

Soft Skills : Analytical Thinking, Problem Solving, Communication, Fast Learner

PROJECTS

DEEPFAKE CONTENT MONITORING AND REAL-TIME ALERT SYSTEM FOR SOCIAL MEDIA (PYTHON, TENSORFLOW, RESNET, OPENCV)

Jan - 2026

- Built a deep learning-based deepfake detection system using the ResNet-18 architecture with transfer learning (ImageNet pretrained weights) to classify manipulated video frames
- Implemented an OpenCV preprocessing and feature extraction pipeline for frame sampling, normalization, and model-ready inputs.
- Developed a real-time video inference and alert system to detect and flag manipulated social media content.

DROWSINESS DETECTION WEB APPLICATION (TENSORFLOW + OPENCV)

Feb - 2025

- Built a real-time driver monitoring system using Convolutional Neural Networks (CNN)
- Processed live video frames using OpenCV for eye detection and fatigue analysis
- Trained deep learning model to classify alert vs drowsy driver states

EXPERIENCE

DATA SCIENCE INTERN | VULTURE LINES TECHNOLOGIES

Jul 2025 - Aug 2025

- Developed backend data processing modules using PHP and MySQL
- Implemented SQL queries and statistical analysis techniques for structured datasets
- Improved data processing efficiency by 30% through automation

DATA SCIENCE INTERN | COGNIFYZ TECHNOLOGIES

Aug 2024 - Sep 2024

- Analyzed large datasets (50K+ rows) using Python, Pandas, and NumPy to identify patterns and trends
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA)
- Built data visualizations using Matplotlib and Seaborn to communicate insights to stakeholders
- Improved reporting efficiency by 25% through automated analysis workflows

ADDITIONAL INFORMATION

LANGUAGES : English (Fluent), Tamil (Fluent), Hindi (Basics)

CERTIFICATIONS : Gen AI powered data analytics - TATA(2025) ,PowerBI - MICROSOFT(2025)
